Private Equity, Venture Capital Market in India surges to \$43 billion as buyouts dominate

India's Private Equity and Venture Capital (PEVC) market rebounded strongly in 2024, reversing two years of contraction with a 9% rise in investments to reach \$43 billion across 1,600 deals. As Asia-Pacific's second-largest PE-VC hub, India continues to attract global capital, signalling renewed investor confidence in its macroeconomic stability and long-term growth potential.

According to Bain & Company's 'India Private Equity Report 2025', published in collaboration with the Indian Venture and Alternate Capital Association (IVCA), while growth-stage investments drove much of the resurgence, private equity remained steady at \$29 billion. A major shift towards buyouts was evident, with their share of total PE activity surging to 51% from 37% in 2022. Investors are increasingly securing control positions in high-quality assets, leveraging record dry powder reserves to pursue scalable opportunities.

India-UK FTA to enhance bilateral trade, create new job avenues, and boost economic growth

In a landmark move marking a new chapter in global commerce, India and the United Kingdom have successfully concluded a Free Trade Agreement (FTA), bringing an end to years of negotiations. The deal, hailed as a 'historic milestone' by Prime Minister Narendra Modi, is expected to significantly enhance bilateral trade, create new job avenues, and boost economic growth.

For India, the agreement presents both opportunities and challenges. While it opens doors for increased exports and foreign investment, it also raises concerns about domestic industries facing heightened competition. The deal is expected to catalyse trade, investment, and innovation, but its long-term impact on India's economy remains to be seen.
