## Snippets

### India's manufacturing momentum signals deeper economic resilience

Mumbai: India's manufacturing sector has reached a significant milestone, with the Purchasing Managers' Index (PMI) hitting a 17.5-year high. This development, highlighted by Commerce and Industry Minister Piyush Goyal at the 21st Annual Global Investor Conference, reflects a broader economic resurgence underpinned by robust infrastructure investment and policy reforms. The PMI, a key indicator of industrial activity, suggests strong expansion in manufacturing output, new orders and employment. While the precise PMI figure was not disclosed, its historical peak underscores renewed confidence among producers and investors.

### Government's export obligation extension offers relief to chemical exporters

Mumbai: India's chemical sector has received a significant policy reprieve with the extension of the export obligation period under the Advance Authorisation scheme from 6 months to 18 months for products covered by Quality Control Orders (QCOs). The change, formalised through Notification No. 28 dated May 28, 2025, by the Directorate General of Foreign Trade (DGFT), follows recommendations from the Department of Chemicals and Petrochemicals (DCPC) and mirrors similar adjustments made for other sectors such as textiles. The timing of this decision is notable. In the financial year 2024-25, chemical exports reached \$46.4 billion, accounting for 10.6% of India's total export value.

### Steep US tariffs to slash India's shrimp exports by 15-18%; Domestic market and new export destinations in spotlight

Mumbai: India's shrimp export volume is expected to fall by 15-18% in the current fiscal year following a sharp increase in tariffs imposed by the United States, according to a report released by Crisil Ratings. The new tariff rate of 58.26%, which includes countervailing and anti-dumping duties, came into effect on August 27, 2025, and has rendered exports to the US market economically unviable for most Indian processors. The US accounted for nearly 48% of India's \$5 billion shrimp exports in fiscal 2025, making it the largest destination for Indian seafood. Crisil Ratings noted that while exporters had anticipated the tariff hike and front-loaded shipments in the first quarter, overall revenues are still projected to decline by 18-20% year-on-year.
