Government notifies Startup India Fund of Funds 2.0 with ₹10,000 crore corpus to mobilize capital for startups

The Government has notified the Startup India Fund of Funds 2.0 (Startup India FoF 2.0) with a total corpus of ₹10,000 crore for the purpose of mobilizing venture and growth capital for the startup ecosystem of the country.

The Startup India FoF 2.0 builds upon the strong performance of the Fund of Funds for Startups (FFS 1.0), which was launched in 2016 under the Startup India Action Plan to address funding gaps and catalyse the domestic capital for startups.

Startup India FoF 2.0 will have a total corpus of ₹10,000 crore for commitments to eligible Alternative Investment Funds (AIFs) spread across the 16th and 17th Finance Commission cycles. Investments under Startup India FoF 2.0 will focus on Alternative Investment Funds supporting priority segments including deep tech startups, early growth stage startups supported by smaller AIFs, technology-driven and innovative manufacturing startups, and sector or stage agnostic startups.

Ministry of New and Renewable Energy Showcases India's Growing Hydrogen Startup Ecosystem at One-Day Exhibition

The Ministry of New and Renewable Energy (MNRE) organized a one-day Hydrogen Startup Exhibition. The aim of the exhibition was to promote the vibrant hydrogen startup ecosystem in the country.

The exhibition brought together 18 promising startups working across various segments of the green hydrogen value chain, including electrolyser technologies, fuel cell applications, biomass-to-hydrogen production, and digital solutions for hydrogen systems. The participating startups demonstrated their technologies and products and interacted with key stakeholders from government, industry, and the research community.

It may be noted that as per Department for Promotion of Industry and Internal Trade (DPIIT), there were 249 startups in the hydrogen area as of September 2025. The participating companies included five electrolyzer startups (electrolyzers and associated stack components), two hydrogen production startups, one fuel cell startup, one hydrogen applications startup, one safety startup (MEMS-based sensor), two drone startups, three hydrogen cooking startups, one artificial intelligence/machine learning startup, and two bio-hydrogen startups.
